BURASCHI
Nets Joining Solutions

RP7 SPORT

Top performing Net Sewing Machine for safety and sport nets.

Specifically for knotted and knotless nets.

Heavy-Duty Net Sewing Machine: Built to Last, Day After Day

Precision. Power. Speed.

Our heavy-duty net sewing machine is engineered with premium materials to handle the toughest jobs, delivering consistent, high-quality performance every day. Perfect for both sports and safety nets, this machine ensures top-tier results across a range of applications.

Unmatched Durability & Precision

- **CNC-Machined Components:** All main components are CNC machined from high-grade AISI 315 steel, offering extreme resistance compared to micro-cast parts.

- **Blunt-Tipped Needle:** The special steel needle prevents fiber damage, keeping nets in top condition.

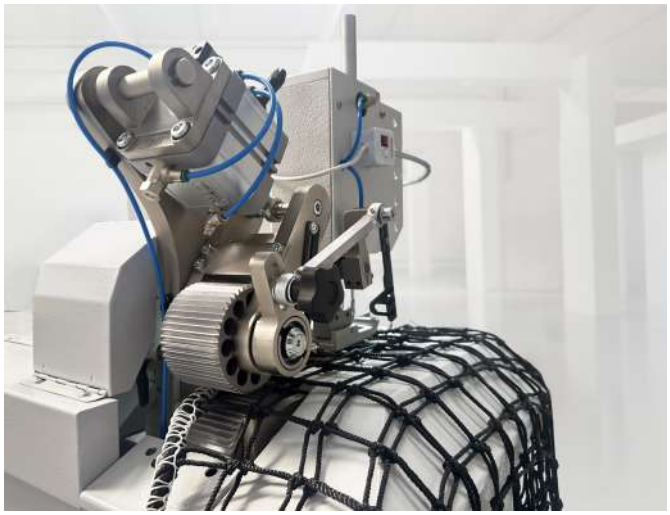
High-Speed, Continuous Sewing

- **700 Stitches Per Minute**: The machine operates at up to 700 stitches per minute, allowing continuous, interruption-free sewing for maximum efficiency.
- **Versatility Without Adjustments**: Seamlessly sew nets with or without knots, and handle one or two layers without the need for additional adjustments.
- **Lead Rope Compatible**: Designed to sew even the most durable lead ropes with ease.

Sew at Top Speed

At 700 stitches per minute, with each stitch being approximately 1 cm (0.033 feet) long, you can sew up to:

- **50 meters (164 feet):** In about **7 minutes and 8 seconds**
- **50 feet (15 meters**): In about **2 minutes and 8 seconds**



Powerful EFKA Electronic Motor

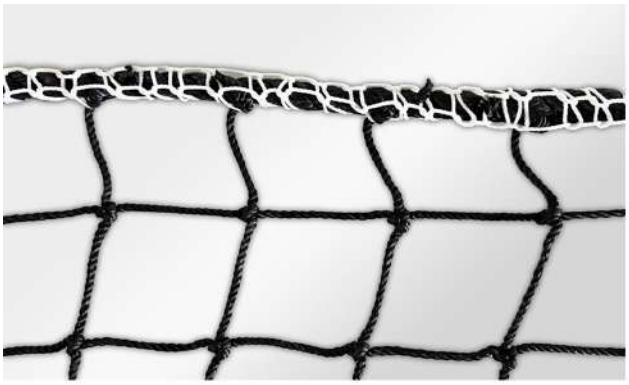
- **Adjustable Sewing Speed:** Controlled via a foot pedal for precision.
- **Needle Stop Function**: Set needle to stop in a pre-set position for easier handling.
- **Custom Settings**: Adjust speeds for different tasks directly from the display.
- **Pneumatic Presser Foot:** Automatic lift and wider clearance for easy material flow.

Advanced Double Traction Puller

- **Patented System:** Our patented double traction puller system features synchronized double traction that adjusts to the length of the stitch. This ensures consistent tension and smooth feeding of the material, enhancing the overall quality and precision of the sewing process.
- **Enhanced Material Handling:** The puller system effectively manages various materials, including dense or layered nets, ensuring uniform feeding and reducing the risk of material shifting or bunching during sewing.

Versatile Sewing Capabilities

This machine handles various net-sewing tasks, including:



1. Small diameter nets to knotted rope

2. Small diameter double net to rope

3. Medium diameter net to rope

4. Medium diameter double net to rope

5. Corner and lead rope sewing

6. Large diameter double net to rope

7. Knotless net to rope

8. Knotless net to lead rope

Technical Specifications

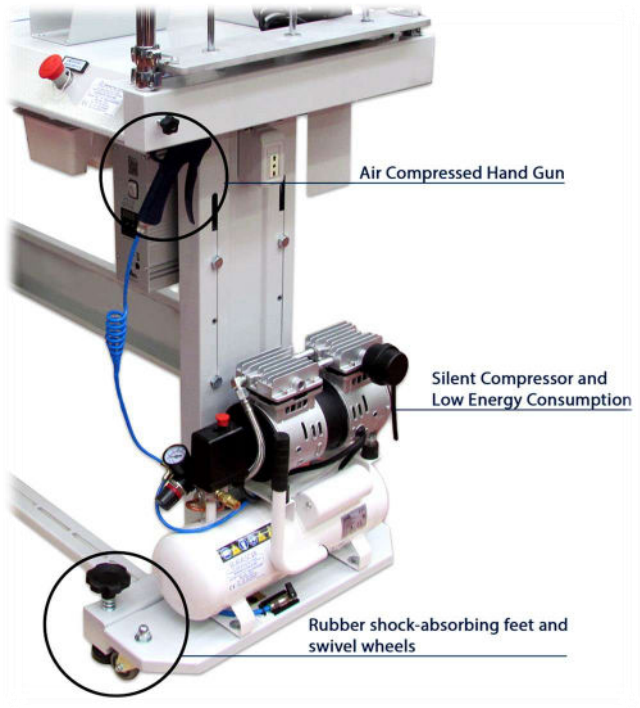
POWER:	220-240V Single Phase, 50/60Hz, 1200W
OPTIONAL TRANSFORMER:	110V Single Phase
STITCH LENGTH:	Adjustable 8 to 15 mm (Approx. 1 cm or 0.033 feet)
SEWING THICKNESS:	Up to 20 mm
STITCH SPEED:	Up to 700 stitches per minute
DIMENSIONS:	122 cm L x 60 cm W x 133 cm H (48" L x 24" W x 52" H)
WEIGHT:	178 kg (392 lbs)
NEEDLE SIZE:	400 BUR

Make your nets stronger, safer, and longer-lasting with our heavy -duty net sewing machine.

Plug-and-Play Convenience

This system comes ready to go, with all essential components pre-assembled:

- Sewing head, tabletop and motor
- Pneumatically controlled presser foot and puller
- Patented pneumatic puller system with synchronized double traction
- Built-in knot stopper and needle protection to prevent damage
- Silenced compressor
- Two-year warranty



Perfect for Sports and Safety Nets

Our machine meets international standards, producing durable seams. It's ideal for batting cages, baseball, golf, football, ski, and protective safety nets.
